WFMC Family,

There is a lot of information going around online about this disease - and there will be more to come. Some of it helpful, some of it wildly errant, even panic-inducing. I tend to take seriously only that which is easily able to be verified by medical professionals, etc.,

In that vein, I offer you [this transcript of an interview with Dr. Charles Kennedy](#), a highly regarded infectious disease M.D. here in Lexington. Our local WLEX-18 television station interviewed him yesterday regarding this pandemic. I found his responses measured, helpful and reassuring. Maybe you will as well.

Blessed Lord's Day to you,

Pastor Daryl
